DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 26-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Sandstrom et al (U.S.Pat. 6,624,880).

With respect to claims 26-30, Sandstrom et al discloses an micro lithography and corresponding method comprising all of the limitations of the instant claim such as: providing a reflective liquid crystal display (30) having an array of configurable pixels (col.3, lines 54-60); functioning as a mask for forming any predetermined patterns including a first image pattern and a second pattern on the reflective liquid crystal display; a radiation (10) for directing radiation from a radiation source onto the reflective liquid crystal display thereby generating a first and second reflected radiation patterns/or generating a continuously varying reflected radiation pattern (see col.7, lines 38-49, lines 55-59 and col.8, lines 1-10); a projection optical system

(col.5, lines 38-63) for reducing and projecting the first and second reflected radiation patterns onto a substrate (60).

As to claim 31, Sandstrom et al further disclose the radiation source being an optical light source, an ultraviolet light source, an excimer laser, an x-ray source, an electron sourer, or an ion source (see col.7, lines 50-59).

Prior Art Made of Record

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

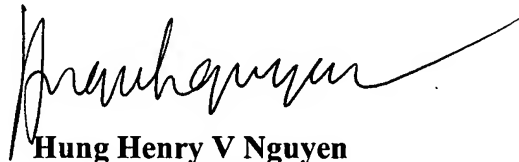

Lin (U.S.Pat. 6,215,578); Marle (US 2002/0171816 A1) and Fries (U.S.Pat. 6,544,698) discloses Maskless pattern generation photolithography system and have been cited for technical background.
